

# ■ TeachPrint Math Quest

## 3rd Grade Multiplication • Beginner

■ Level 1: Warm up your brain with mini mysteries, riddles, and multiplication traps.

Name: \_\_\_\_\_ Date: \_\_\_\_\_

■ Mission: Read carefully! Some questions are trying to trick your brain.

### ■■ Mystery Groups

1. The Snack Detective finds 3 bags. Each bag has 4 cookies, but she eats 1 cookie from each bag. How many cookies are left? \_\_\_\_\_
2. Four aliens each have 3 eyes. Then one alien puts on sunglasses. How many eyes are there altogether? \_\_\_\_\_
3. Four groups of 3 are hiding in a picture. Write the multiplication sentence AND the repeated-addition sentence. \_\_\_\_\_

### ■ Multiplication Treasure Hunt

1. You can take 2 jumps at a time. You need to make 12 jumps. How many 2-jump moves? \_\_\_\_\_
2. A dragon has 5 treasure chests with 3 coins in each. It gives away 2 coins. How many coins remain? \_\_\_\_\_
3. Which is larger:  $4 \times 3$  or  $3 \times 5$ ? How much larger? \_\_\_\_\_

### ■ Trick-or-Treat Thinking

1. Sam says  $2 \times 6 = 8$  because  $2 + 6 = 8$ . Is Sam correct? \_\_\_\_\_ Explain why.
2. Circle the expression that means 3 groups of 4:  $3 + 4$  /  $4 + 4 + 4$  /  $3 \times 4$  /  $4 \times 4$
3. Riddle: I have 4 groups. Each group has the same number. Altogether I have 20. How many are in each group? \_\_\_\_\_

# ■ Mission Answers

Check your thinking—not just your answer!

## ■■ Mystery Groups

1. 9 cookies
2. 12 eyes
3.  $4 \times 3 = 12$ ;  $3 + 3 + 3 + 3 = 12$

## ■ Multiplication Treasure Hunt

1. 6 moves
2. 13 coins
3.  $3 \times 5$  is larger by 3

## ■ Trick-or-Treat Thinking

1. No. Multiplication represents equal groups;  $2 \times 6 = 12$ .
2.  $3 \times 4$  (also  $4 + 4 + 4$ ).
3. 5
